DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elastic member and the longitudinal channels must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The longitudinal channels are not described in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17, 23, 24 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Tiberious et al. (2003/0047174)

As to claim 17, Tiberius et al. discloses a barrel, trigger and stock zones (fig. 4) a pressurized gas cylinder (60) connected to a valve chamber (26); and a valve element (46) configured to connect to the valve chamber and a firing chamber (34); wherein the valve element is configured to be moved by an elastic means towards a closed position

Application/Control Number: 10/719,013

Art Unit: 3644

(fig. 4) and an open position (fig. 5) by impact of the hammer (bolt) and a sealing device (41).

As to claim 23, disclosed is an ammunition store (16); a plurality of pellets (fig. 5); a push (96) and a release mechanism (33).

As to claim 24, disclosed is a spring (96).

As to claim 37, disclosed are channels (fig. 4).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38-41, 45 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Maeda (6497229).

As to claim 38, Maeda discloses a firing chamber, a barrel; a trigger; a sliding cover (7); an ammunition magazine (2); a gas cylinder (27) and a sealing device (25).

As to claim 39, disclosed is the sealing device is initiated when the trigger is pressed.

Art Unit: 3644

As to claim 40, disclosed is a rear wall and a perimeter edge (fig. 5).

As to claim 41, disclosed is an interior surface of the cylindrical wall is configured to define a continuation portion of the barrel (6) and an outer surface of the wall configured to fit within the interior surface of the firing chamber (5).

As to claim 45, disclosed is the pellet released from the firing chamber when the sealing device is fully engaged.

As to claim 46, disclosed are a plurality of pellets (W) arranged in a column; a push mechanism (3) and a release mechanism (4).

Allowable Subject Matter

Claims 18-22, 25-36, 42-44 and 47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jordan Lofdahl whose telephone number is 703.605.1217. The examiner can normally be reached on m-f 9-5.

Application/Control Number: 10/719,013 Page 6

Art Unit: 3644

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 703.305.7421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
